Attn: Bill Ryan, Chief Operator

Dear Mr. Ryan,

This letter will serve to confirm that GEA Mechanical Equipment US, Inc. GEA Westfalia Separator Division does not have any Contractors or Distributors who are authorized to affect any type of repair or service to its equipment or machinery. We also maintain strict control of all confidential and proprietary information as well as design and repair drawings which are only available through our dedicated computer system at our office locations. All Field Service work as well as all Factory Repairs are performed only by GEA Mechanical Equipment US, Inc.'s own employees and at its facilities that are owned and operated by itself.

We maintain two (2) of our own fully trained and staffed Repair Facilities; one on the East Coast located in Northvale, New Jersey which is our main Corporate Office and the other is on the West Coast in Patterson, California. We maintain a full stock of spare parts at our centrally located warehouse in Romeoville, IL. Both repair facilities maintain a stock of frequently used repair parts and have direct access to our global network of spare parts warehouses to support you and your machines. We can perform any aspect of necessary repair and field support for any product or machine that GEA Mechanical Equipment US, Inc. sells and delivers to the market.

GEA Mechanical Equipment US, Inc. does maintain limited "Dealer" relationships only for the sales of machines in the Marine and Power Distribution market areas. To clarify your question once again we do not maintain any relationships with anyone for the Service and Repair of any of our equipment.

If there are any specifics that I have not addressed herein, please feel free to call or contact me directly so that I can address them as needed.

Best Regards,

A handwritten signature in black ink, appearing to read 'Chris Sandiford', is written over a horizontal line.

Chris Sandiford
